Characterizing postoperative cognitive dysfunction in the elderly

The research described in this thesis was performed at the department of Molecular Neurobiology, University of Groningen, and the department of Surgery and Surgical Oncology, University of Groningen, University Medical Center Groningen. Financial support by the University of Groningen, Research School of Behavioral and Cognitive Neuroscience (BCN), Danone Research – Centre for Specialised Nutrition, Noldus Information Technology, Greiner Bio-One, and Alzheimer Nederland is gratefully acknowledged.

Cover design: Kim Taminiau

The cover design is roughly based on the Vanitas and Memento Mori themes in art that symbolically represent the transient nature of earthly life and incorporates objects related to the research performed in this thesis.

“And, as always happens, and happens far too soon, the strange and wonderful
becomes a memory and a memory becomes a dream. Tomorrow it’s gone.”

Terry Pratchett, *Winthersmith*

Table of contents

GENERAL INTRODUCTION	9
CHAPTER 2	19
Thinking through postoperative cognitive dysfunction: How to bridge the gap between clinical and pre- clinical perspectives.	
CHAPTER 3	51
Postoperative cognitive dysfunction: involvement of neuroinflammation and neuronal functioning.	
CHAPTER 4	75
Postoperative cognitive dysfunction and microglial activation in associated brain regions in old rats	
CHAPTER 5	91
Surgery-induced behavioral changes in aged rats.	
CHAPTER 6	119
Prior infection exacerbates postoperative cognitive dysfunction in aged rats.	
CHAPTER 7	145
A novel method for evaluating microglial activation using IBA-1 staining: cell body to cell size ratio.	
CHAPTER 8	163
The cognitive status before surgery determines the association between the perioperative inflammatory response and postoperative cognitive performance	
GENERAL DISCUSSION	185
The involvement of (neuro)inflammation in postoperative cognitive impairment
